

Work Resources

For your convenience--and sometimes required--Windows 7 and above have [Work Resources](#). It's a nicer way given so that you can launch your RemoteApps. Generally, you log in only once and then do not have to re-log in.

From the Control Panel, navigate to RemoteApp and Desktop Connections

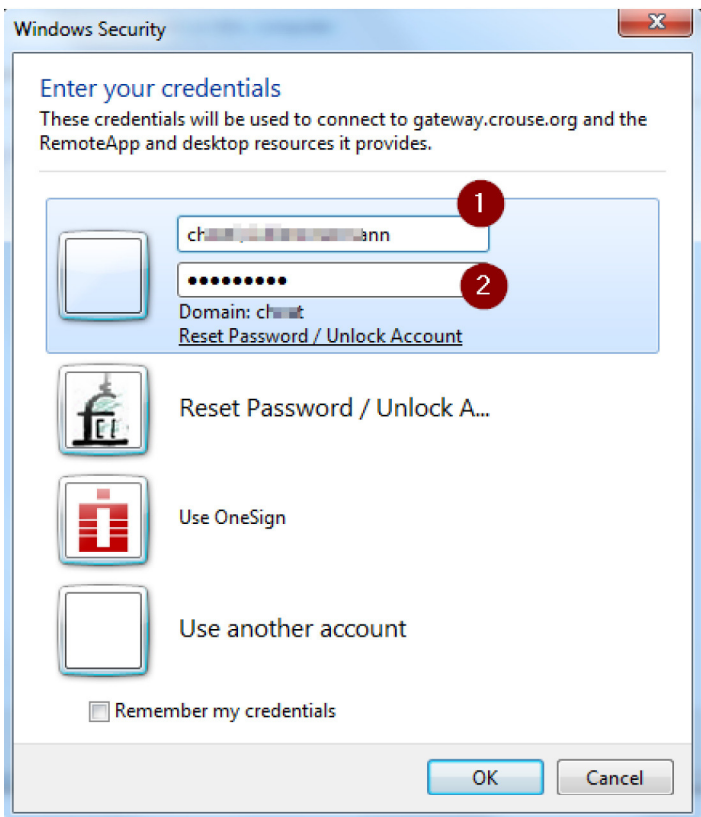

Enter in your URL to your RDWeb server. They like it when you type in the full URL

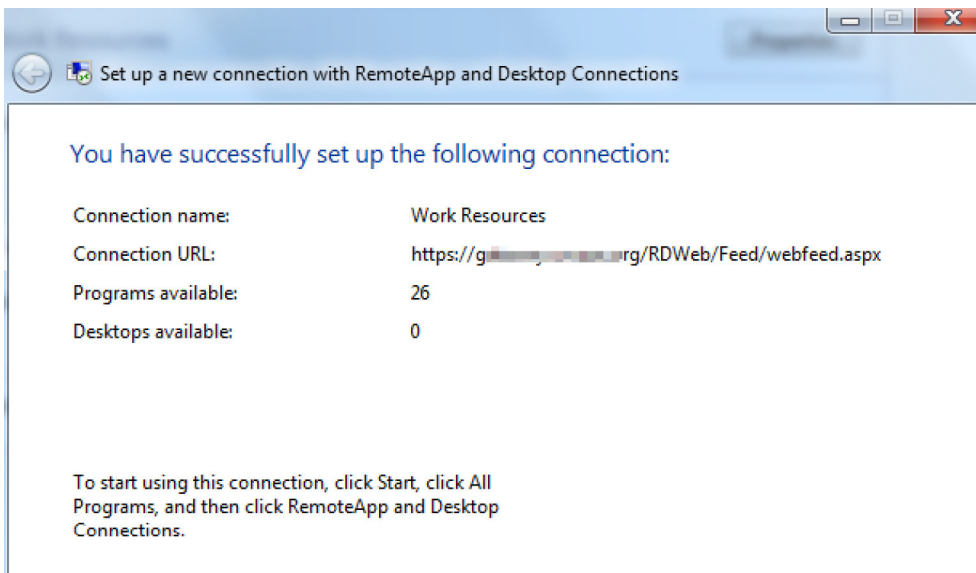

Enter in your credentials in the form DOMAIN\UserName

** Cool thing is that if you stay logged into Work Resources, you don't have to re-enter your credentials

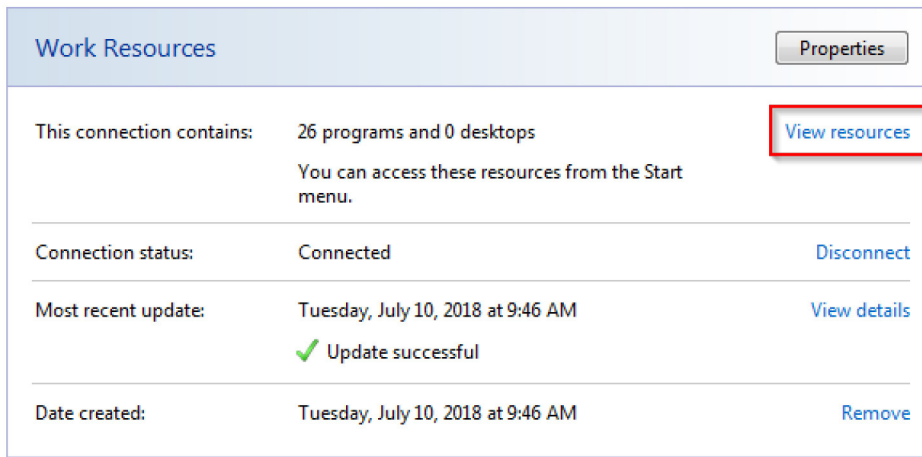

If all goes well, you'll have a Success Message

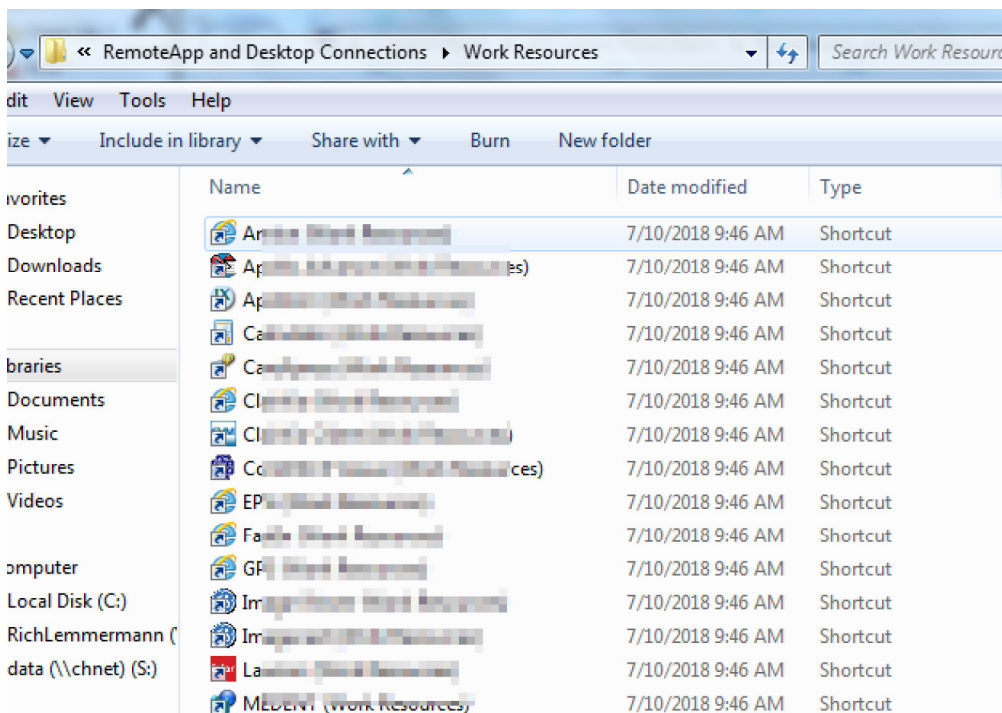

Here you can click on View resources to get a listing of available RemoteApps

Connect to desktops and programs at your workplace

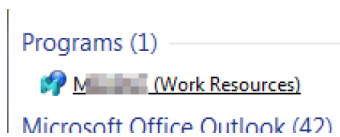

The screenshot shows a 'Work Resources' window with a 'Properties' button in the top right. The main content area displays: 'This connection contains: 26 programs and 0 desktops' and 'You can access these resources from the Start menu.' A 'View resources' button is highlighted with a red box. Below this, the connection status is 'Connected' with a 'Disconnect' link. The most recent update is 'Tuesday, July 10, 2018 at 9:46 AM' with a 'View details' link and a green checkmark indicating 'Update successful'. The date created is also 'Tuesday, July 10, 2018 at 9:46 AM' with a 'Remove' link.

This is just a screen shot of how they look

The screenshot shows the 'RemoteApp and Desktop Connections' window. The address bar indicates the current view is 'Work Resources'. The main pane displays a list of resources with columns for Name, Date modified, and Type. All resources are shortcuts created on 7/10/2018 at 9:46 AM. The list includes: Arminia (Work Resources), Application (Work Resources), Application (Work Resources), Callcenter (Work Resources), Campaign (Work Resources), Client (Work Resources), Client (Work Resources), Client (Work Resources), EP (Work Resources), Family (Work Resources), GP (Work Resources), Image (Work Resources), Image (Work Resources), Landed (Work Resources), and MEDENT (Work Resources).

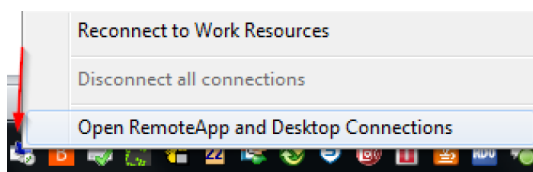

You can also launch the icons off of the START menu

The screenshot shows a Start menu with a 'Programs (1)' section. Under this section, there is a single icon for 'Microsoft Office Outlook (47)'. A red arrow points to the icon, which is labeled '(Work Resources)'.

This tray icon is an easy way to see that your:

- Logged in
- And can open up your Resources by clicking on Open RemoteApps and Desktop Connections

The screenshot shows the system tray with a context menu open for the RemoteApp and Desktop Connections tray icon. The menu options are: 'Reconnect to Work Resources', 'Disconnect all connections', and 'Open RemoteApp and Desktop Connections'. A red arrow points to the tray icon.
